PROJECTS

SITE BUILDER
KaneCBD Site Migration and Redesign | August 2019 — September 2019
- *https://kanecbd.com*
- Migrated client's content from Webflow to Squarespace.
- Implement responsive HTML embeds within the Squarespace markup interface.
- Technologies Used: Squarespace, Adobe Photoshop

FRONT END DEVELOPER
Stanford Mathematics Site Theme Revamp | April 2019 — July 2019
- *https://mathematics.stanford.edu*
- Convert the mockup created by our team Vision Designer into SCSS markup.
- Implement a responsive and accessible website theme that is desktop, tablet, and mobile device compatible.
- Technologies Used: Drupal 7, Atom, HTML, CSS, SCSS, Git

FRONT END DEVELOPER AND SITE BUILDER
Stanford Human Artificial Intelligence Site | February 2019 — Present
- *https://hai.stanford.edu*
- Brought Sullivan Design's mock up to life and implement a responsive and accessible website theme that is desktop, tablet, and mobile device compatible.
- Maintain and update site content per client's request.
- Technologies Used: Drupal 7, Atom, CSS

UI/UX DESIGNER AND DEVELOPER
Check It Out | June 2018 — Present
- *www.checkit.club*
- Develop a mock up website based off the client's needs and preferences.
- Implement a responsive webpage layout that is desktop, tablet, and mobile device compatible.
- Assist in debugging, accessibility testing, and incorporated client and user feedback into the final product.
- Continue to maintain site and design per client's request.
- Technologies Used: Sketch, Adobe Photoshop, Sublime, HTML, CSS, Git

EXPERIENCE

CUSTOMER EXPERIENCE SPECIALIST, ACTING FRONT END DEVELOPER
Stanford Web Services | January 2019 — Present
- Implement, and manage CMS-based websites, and interfaces from initial design and architecture through development, test, and deployment.
- Work in tandem with back-end developers to implement and maintain features and functionality for Stanford-specific modules and themes.
- Implement and maintain content management systems, including installation, configuration, theme and plug-in integration, and ongoing support of departmental liaisons using existing platforms and tools.
- Support the development and maintenance of web applications, including building search indexes, integrating web designs, and building small collection websites.
- Perform maintenance duties, such as scripting, adding new content to collections, rebuilding indexes, and maintaining templates and supporting pages.

COLOR CONSULTANT AND PRODUCT SPECIALIST
Sherwin Williams | May 2018 — December 2018
- Ability to coordinate a variety of colors and materials to achieve clients vision.
- Consistent following up on promises and commitments in a timely manner with clients.
- Build and maintain long-term customer relationships
- Understand stock levels to ensure customer orders are handled effectively.
- Assist customers in determining order requirements or services.
- Appropriately identify and escalate customer issues.
- Quote prices and credit terms, and prepare sales orders for customers.
- Complete sales transactions and processing of special orders.

FRONT END SUPERVISOR
Ross Stores Inc. | June 2017 — November 2017
- Provide efficient and friendly service while in charge of the front end customer service box.
- Manage a diverse team of six customer service representatives working in various shifts.
- Assist customers on the sales floor.
